

Introduction to Entrepreneurship & Leadership

Lecture 2 — Study Summary

Course: Innovative Entrepreneurship — Theory and Practice 111 (IETP 111)

Institution: International College of Digital Innovation (ICDI), Chiang Mai University

Instructor: Dr. Michael Harris

This document condenses the Lecture 2 slide deck into a structured, multi-section study summary. It covers the course logistics, the team project, mission statements, the entrepreneurial mindset and process, the link between entrepreneurship and leadership, and a leadership-style self-assessment.

Contents

- 1. Lesson Topics & Learning Outcomes
- 2. Course Logistics & Assessment
- 3. Team Project — Business Model Canvas
- 4. Mission Statements (Corporate & Personal)
- 5. What Is an Entrepreneur?
- 6. The Entrepreneurial Process
- 7. Entrepreneurship & Leadership
- 8. Leadership-Style Self-Assessment
- 9. Key Takeaways

1. Lesson Topics & Learning Outcomes

Lesson topics

- Understanding entrepreneurship and entrepreneurial thinking.
- Crafting mission statements — corporate and personal.
- Deeper personal knowledge: knowing yourself and your "inner entrepreneur."
- How the entrepreneurial process is relevant and can be applied in any context, and how leadership connects to it.

What you will learn (Course Learning Objectives)

- Explain the concept of entrepreneurship and the types and characteristics of small businesses.
- Make a personal assessment of the advantages and disadvantages of being employed and/or being an entrepreneur.
- Explain the role and importance of creativity in the entrepreneurial process.
- Explain how businesses grow and how the role of the entrepreneur changes over time.
- These ideas and approaches will be used throughout the ICDI program and your career.

2. Course Logistics & Assessment

Class information

- Schedule: Tu/Wed/Fri; classroom in the ICDI building.
- Slides are uploaded to Canvas before each lesson.
- Contact: Dr. Michael Harris — michael.harris@cmu.ac.th. Office hours by appointment (MS Teams).
- Quizzes are "closed book" — no devices, no notes.

Assessment breakdown

Component	Weight
Attendance and participation	10%
1st quiz (closed book)	10%
In-class assignment	15%
Mid-term project	25%
2nd quiz (closed book)	15%
Final term project	25%
Total	100%

Grading criteria

A: 80–100 | B+: 75–79.99 | B: 70–74.99 | C+: 65–69.99 | C: 60–64.99 | D+: 50–54.99 | D: 55–59.99 | F: 0–49.99

3. Team Project — Business Model Canvas (BMC)

Group work

- Work in groups of about 5 people. Tell the instructor who is in your group by Friday, 3 July (if not before).
- Mid-term project: analyze an existing business and complete a Business Model Canvas (BMC), then give a 5-minute presentation (sessions on 6th and 10th August).
- Final project: propose a NEW digital business idea and deliver a "rocket pitch" plus a written business plan / business model.
- Generative AI is not allowed to perform the BMC for you in the in-class assignment.

The "Need" — questions to define the opportunity

- What is the need you are solving, and who has it?
- Who is the target market, and how big is it? Is it growing?
- Is this an opportunity worth pursuing, and why?

The "Solution" — product, service & goals

- What is your product or service, and who are your competitors?
- How is your solution different / better?
- How will the business make a profit? What is your financial projection and how did you arrive at it?
- What do you need to get started (capital, equipment, expertise, etc.)?

The audience & "Call to Action"

- The pitch must communicate the business idea and plan, and include a clear call to action.
- You are evaluated not only on the business idea but also on how well you present it to the audience.

4. Mission Statements

A mission statement is a short sentence that captures why a company exists and the direction it is pursuing.

Corporate examples discussed

- Microsoft — "Empower every person and every organization on the planet to achieve more."
- Google — "To organize the world's information and make it universally accessible and useful."
- Apple — "...dedicated to making the best products on earth, and to leaving the world better than we found it."
- Nike — "To bring inspiration and innovation to every athlete in the world."
- Tesla — "To create the most compelling car company of the 21st century by driving the world's transition to electric vehicles."
- Zara — focuses on speed: understand what customers want and get new products to them faster than anyone else.

Activity (5 minutes)

- Choose your favourite company. What is its mission statement, and what is the focus / business strategy behind it?
- Prepare to present your ideas to the class.

Personal mission statements & reflection

- A personal mission statement clarifies your values and helps guide decisions and business ideas.
- Oprah Winfrey — "To be a teacher. And to be known for inspiring my students to be more than they thought they could be."
- Richard Branson — "To have fun in [my] journey through life and learn from [my] mistakes."
- Keep it short (two or three sentences), grounded in your background and values; you will use it throughout the course.

5. What Is an Entrepreneur?

Definitions

- Babson College: "Entrepreneurship is a way of thinking and acting that focuses on identifying opportunities to create value..."
- Haas Center for Entrepreneurship: "Entrepreneurship is the journey of opportunity exploration and risk management, driven by a passionate individual or team."

Qualities of an entrepreneur

- Creative and critical thinker; always brainstorming solutions.
- Transforms a need or a problem into a workable solution.
- Brings people together to work toward a common objective.
- Understands personal limitations and asks for help.
- Practices constant reflection and education.
- Uses brainstorming — coming up with multiple ideas without formal limitations.

6. The Entrepreneurial Process

A four-stage cycle: Act, Learn, and evolve.

- **1. Awareness** — self- and other-observation; understand yourself and others; identify your team and partners.
- **2. Needs Analysis** — empathy and community; define the need / problem you are addressing.
- **3. Testing & Analysis** — build a marketing plan, sales and outreach strategy, and assess costs and revenue.
- **4. Build & Grow** — financial structure and planning; test, share, and evolve your idea.

7. Entrepreneurship & Leadership

- Leadership and entrepreneurship are deeply intertwined — one cannot exist without the other.
- Crucial leadership qualities for an entrepreneur: vision, influence, innovation/creativity, and the ability to lead and inspire people.
- Steve Jobs: "Leadership means inspiring people to do things they never thought they could." Jobs's obsession with detail shaped Apple — the Lisa (1983) introduced a graphical user interface (GUI) and is widely seen as the first mass-market personal computer with a GUI.

8. Leadership-Style Self-Assessment

In the activity, you answer questions (sets A and B) and add up your circled numbers to find your dominant style. The four styles and what each prefers:

Expressive (A 7–10, B 5–7)

- Focus: ideas, dreams, energy, vision. Likes appreciation; dislikes isolation; often takes risks.
- Decisions influenced by testimonials (personal stories); quick and impulsive; attacks the issue in conflict.
- Most enjoys the THINKING section. Work with them by listening and presenting positive alternatives.

Supportive (A 7–10, B 8–10)

- Focus: people and feelings. Likes friendship/relationships; dislikes conflict; tends to avoid risk.
- Needs safe guarantees and clear solutions; unhurried, agreeable; complies in conflict.
- Most enjoys the MARKETING/COMMUNICATION section. Ask their opinion and create a safe environment.

Driver (A 11–14, B 5–7)

- Focus: productivity, action, results, structure. Likes accomplishing tasks; dislikes inaction; often takes risks.
- Needs to see options and possibilities; efficient, "do it now"; works independently in conflict.
- Most enjoys the DOING section. Don't ignore or compete with them — display results.

Analytic (A 11–14, B 8–10)

- Focus: facts, principles, rules. Likes being right and predictable patterns; dislikes involvement; avoids risk.
- Needs evidence and a clear future; disciplined and accurate; an avoider in conflict.
- Most enjoys the ACCOUNTING section. Address procedures and enlist them in planning.

Reflection: Which style are you? Do you agree with the result? How can you use this when assigning roles and collaborating on your team projects?

9. Key Takeaways

- Entrepreneurship is a mindset of spotting opportunities, creating value, and managing risk — applicable in any context.
- Mission statements (corporate and personal) align actions with values and give direction.
- The entrepreneurial process is iterative: become aware, analyze needs, test, then build and grow — always learning.
- Leadership and entrepreneurship are inseparable; vision, influence, and creativity drive both.
- Knowing your leadership style (Expressive, Supportive, Driver, Analytic) helps you collaborate and divide team roles effectively.
- Course deliverables (BMC mid-term, rocket-pitch final) apply these ideas to a real or proposed digital business.

Additional discussion

- Watch Margaret Heffernan's TED talk, "The human skills we need in an unpredictable world" (2022), and discuss which human skills will be necessary in the years ahead — do you agree or disagree, and why?
